

Led by experienced Chesapeake Academy staff, this camp promises a dynamic and fun experience for young campers! Camp Irvington is the perfect place for campers to explore new activities, discover new interests, and meet new friends. This full-day program for children ages 4 to 6 nurtures campers' curiosity and offers a wide variety of activities on and off campus – weekly trips, arts and crafts, silly competitions, games, and more! Campers are on the go around town and beyond.

Camp Irvington

Camps are for 4–6 year olds ~ 8:15 a.m.–5:30 p.m. Monday–Friday ~ June 17–Aug. 16 ~ \$275/wk unless otherwise noted
There is a one-time registration fee of \$30 per camper.

“Is it ...”

... fictional?

JUNE 17–21

Is it a book character? Can I do it, too? Curious George is always up for an adventure. He rides a bike, makes pancakes and pizza, and folds paper boats. Campers will try out some of George’s best adventures. The beloved character is also featured at the Virginia Science Museum’s new Let’s Get Curious exhibit. The exhibit features math, science and engineering activities.

Field Trip: Virginia Science Museum

... aquatic?

JUNE 24–28

Is it a fish? Does it have bones? Welcome to CA’s own shark week! Campers will learn about these fascinating creatures and some fictional friends like Clark the Shark in the Shark Zone.

Field Trip: Virginia Living Museum

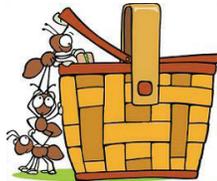

... on a picnic?

JULY 1–5 (NO CAMP JULY 4TH)

COST \$225

Is it on picnics? Does it fit in a picnic basket? Campers will spend the morning preparing for their picnic by creating a picnic basket with special snacks and activities based on clues. Each afternoon they will picnic and play at a fun mystery location. Of course this week includes splashes of red, white and blue.

Field Trip: Picnic and play in Northern Neck locations

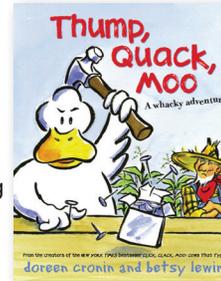

... on a farm?

JULY 8–12

Is it on a farm? Is there a barn? Campers will explore farm life around the Northern Neck, learning what is grown in our area and what animals live on a farm. Look for fictional farm fun, too, with authors Doreen Cronin and David Shannon.

A visit to a teaching farm will add to the fun.

Field Trip: Maymont Farm Pastures and Wildlife Exhibit

... on a stage?

JULY 15–19

Is it on a stage? Are there bright lights? Join in a week of performance fun. Campers will make musical instruments, show off dance moves, and perform skits on our outdoor stage. Our young performers will attend a professional production in Richmond.

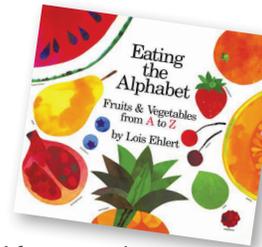

Field Trip: Polkadots: The Musical at the Virginia Repertory Theatre

... edible?

JULY 22–26

Is it edible? Is it sweet, salty, sour? Sometimes we eat the roots. Other times we eat the leaves. Campers will learn about gardening by visiting local farm stands and farms. Campers get to experience the excitement of summer foods and eating a rainbow. Lois Ehlert’s beautiful books will guide the experience.

Field Trip: Local farms around the Northern Neck

Campers will ask questions and explore themes to discover a mystery object each week! Through games, crafts, snacks, songs, books, and outings, campers play and discover. What a fun and enriching way to spend the summer!

... green?

JULY 29–AUGUST 2

Is it green? Can I help? Become a planeteer at CA Camp. Campers will explore the beautiful environment of the Northern Neck and learn ways to keep it clean and green. So much positive power will have everyone enthusiastically green! Campers will visit the Virginia Science Museum Green Science exhibit.

Field Trip: Virginia Science Museum

... buoyant?

AUGUST 5–9

Is it buoyant? Does it sink? Young scientist will explore their environment to find out what floats. They will make predictions, conduct experiments, and record results. All that time around water will also keep campers cool. Some experiments will occur in different locations around the Northern Neck.

Field Trip: Hughtlett Point and Belle Isle State Park

... colorful?

AUGUST 12–16

Is it colorful? Is it multicolored? Colors reflect our feelings and help us to express ourselves. Color allows us to stand out or blend in. Campers will learn about rainbows, mixing colors, expressing emotion with color, camouflage, and habitat colors. Campers will use their heightened color senses when exploring the animals at the zoo.

Field Trip: Richmond Metro Area Zoo
